## SUMMARY

Software Development Engineer - GenAI with expertise in full-stack development and AI integration. Proven record delivering multi-tenant platforms and designing robust data synchronisation for large user bases. Seeking to apply Go, Python, and TypeScript skills to drive innovative, scalable software solutions.

## EDUCATION

### UNIVERSITY OF MICHIGAN

*Master's in Computer and Information Science*

- **GPA:** 3.9

**Aug 2023 - Apr 2025**

*Michigan, USA*

### ANNA UNIVERSITY

*Bachelor's in Computer Science and Engineering*

- **GPA:** 3.4

**Jul 2018 - Jul 2022**

*Chennai, IN*

## SKILLS

- **PROGRAMMING LANGUAGES:** Go, Python, TypeScript, JavaScript, C++, HTML5/CSS3, Dart
- **LIBRARIES/Frameworks:** Go Chi, Fast-API, Tailwind-CSS, shaden/ui, Flutter, React/React Native, Next.js, Vue.js, Node.js, RESTful APIs, TanStack\*
- **TOOLS / PLATFORMS:** Docker, Git, Github, AWS, Kubernetes, Google Cloud Platform, Postman, LangChain, Ollama, PyTorch, TensorFlow
- **DATABASES:** PostgreSQL, SQLite3, Supabase, Convex, DynamoDB, Redis, AWS RDS, AWS S3

## PROJECTS AND OPEN SOURCE CONTRIBUTIONS

### GOOGLE | [go-github](#)

#### Contributor

- **Engineered** and implemented new API methods to manage **GitHub Enterprise App repository installations**, successfully **enhancing** the functionality of the widely-used library.
- **Authored production-quality Go code** and **comprehensive unit tests** to guarantee the reliability and stability of new library features.
- **Collaborated with maintainers** through the Pull Request (PR) review process, **refactoring code** to align with established project conventions and Go best practices.

### Chrono - Time Tracking & Project Management Platform | [Chrono](#)

#### Solo Developer

- **Developed a unified productivity suite** to streamline workflow management for small teams. Combined essential tools (Kanban, timesheets) with a custom AI analytics layer, enabling users to switch between multiple AI models for optimised performance reporting
- **Tech stack:** Next.js 16, React 19, TypeScript, Shaden UI, SQLite, Tailwind CSS, and Resend

## EXPERIENCE

### SQUARE RESULTS

**Aug 2025 - Present**

#### Software Development Engineer - GenAI

*Seattle, WA*

- Architected a multi-tenant centralised backend with Supabase, unifying authentication and user management across multiple company websites, reducing login friction by 30% and enabling scalable access for thousands of users.
- Leveraged Supabase's Row-Level Security and real-time capabilities to integrate disparate site user bases into a single, secure login system, resulting in data isolation and seamless cross-site functionality

### CLASSA.AI

**Jul 2025 - Aug 2025**

#### Software Developer - Contract

*Seattle, WA*

- Delivered complete TypeScript schema library and data integration system for 200+ aviation insurance endorsements, automating .docx policy generation with TypeBox validation.
- Enhanced premium calculation and document population processes, integrating with external services to ensure accurate, compliant policy issuance for a scalable insurance platform.

### CENTRAL MARINE RESEARCH INSTITUTE

**Jan 2025 - Jul 2025**

#### Full Stack Engineer

*Remote, WA*

- Developed full-stack applications using Vue.js, Flutter, and Go, serving 100+ researchers with real-time marine data access in low-connectivity environments.
- Built an offline-first system with automatic sync for preserving and restoring user data during connection loss, ensuring consistent access to critical marine research data

### UNIVERSITY OF MICHIGAN

**Sep 2024 - Dec 2024**

#### Research Assistant -GenAI DeepFake

*Dearborn, MI*

- Collaborated with academic experts to design and validate deepfake detection models using TensorFlow, achieving 88.37% accuracy by benchmarking eight models across diverse GenAI image generation datasets
- Architected a full-stack Next.js platform that deployed the model for public testing, used server-side API routes for real-time inference, and designed a SQLite3 schema to capture user feedback, enabling iterative model retraining and improving detection performance

## Achievements

- **Peoples Choice Of The Year 2025 (Googles Cloud Developers):** Designed and Developed AI Voice agent that Automates the Insurance Quoting via Phone calls
